

## Kaihang Shi

### Comments:

The TAs were amazing, always very helpful and knowledgeable about the material. Often times I would go to the TAs or email them as a last resort, often the day before the assignment was due or topic was covered and they would respond within a couple hours. When there was miscommunication or failure to understand my question they went above and beyond to make sure they fully understood what was being asked and provide a full and complete explanation.

Kaihang was AWESOME! He was always there to help whether during office hours or via email. He is very informed on the information and always made the hard topics seem relatively easy.

The TA was also essential to learning the material.

Kaihang is a fantastic TA. He taught a lot of the students the material outside of class and was invaluable.

Kaihang Shi - The best TA ever. Kaihang was the only reason I was able to pass this course and basically taught everything to me. He was very patient, energetic and always willing to help the students no matter how simply confused they were with basic concepts or concepts that they should have already known. Kaihang was the professor of this course and just deserves a PhD.

The Tutorial class for High Pressure Phase diagrams was very helpful.

Kaihang Shi is a great TA. Very knowledgeable and it really felt like he wanted students to understand the concepts. I appreciated the work he did to help us during office hours.

TA is very kind and good teacher. Kaihang

It's the hard work and enormous dedicated help of the TAs which actually helped in understanding the subject.

The TA was excellent. He was very friendly and helpful to help with the hw and general questions about the class. He even made a tutorial session to teach phase diagram.

Kaighan was an amazing TA and it was a pleasure to work with him. He is very passionate about Thermo and patiently explains complex material in a way that others can understand. He stayed after office hours many times to ensure everyone's questions were answered and always responded to my emails promptly. He even organized extra office hours when the material was difficult or the class misunderstood a topic, as evidenced in the hw. I wish that he was the TA in every class that I have!
